Subject: FW: Philip Morris/Winkelmann Protocol Development Agreement

Loreen:

Amy Ryan and I discussed the Winkelmann agreement this a.m. Amy is preparing a revised draft, but I have one outstanding question we need to resolve re: Winkelmann's ability to assign IP rights to PM. Winkelmann currently warrants in the agreement that he is able to assign rights to PM, but I recommend that you or Gerd have the conversation with him and highlight that he is doing so and that in doing so he is warranting that his employment agreement does not conflict in any way with his commitment to us. I do not want to review his employment agreement, but given the fact that he is employed by the university, I think it prudent to highlight this fact for him.

Please let me know if you see a problem in doing so or have any other concerns.

Thanks.
